Cricket One
Feeding The Future

CRICKET ONE

Vietnamese **Nam Dang and Bicky Nguyen**

CricketOne produces sustainable and affordable future food from crickets by developing technologies to rear crickets intensively & vertically on agricultural by-products. Food security is becoming a global issue, and traditional livestock is not sustainable resource wise, compared to rearing crickets for protein powder as well as cosmetic, pharmaceutical products.

Sector:

Agriculture, Technology

ELVISH

Indonesians **Ali Zaenal Abidin,
Irham Mulkan Rodiana and Azmi Roqi**

Elvish aims to improve the standards of living of Indonesian fishermen (the ones with small boats) by escalating their income from fishing up to 90%. This can be done by converting their old diesel motor into electric solar powered motor, thus decreasing their operational cost. They plan to sell electrical systems consisting of an electric motor, battery, solar panel, inverter and lighting which can be easily installed on existing boats. They have already received positive responses from the Indonesian fishermen community, and are currently at the prototyping stage.

Sector:

Agriculture, Technology

EVERYBODY EATS

Americans **Imani Majied and
Muhammad Ansari**

Everybody Eats is a food delivery service that aims to fight hunger and reduce food waste. Similar to the TOMS business model, every meal ordered through the Everybody Eats platform will help subsidize the cost of a meal for someone in need locally.

Sector:

Food & Beverage,
Technology & Digital
Platform

GREENNOVATIONS

Indian **Tanvi Mittal**

The mission of Greeninnovations is to eliminate plastic waste from the environment by virtue of transforming the plastic waste into high utility products, such that the benefits are used to improve the wages of the waste collectors' community. Thus, Greeninnovations aims to create both high social and environmental impact in tandem.

Sector:

Environment & Energy

Sector:
Education & Training

INVOLVE

Indians **Divanshu Kumar and Samyak Jain**

Involve's mission is to create an affordable and accessible ecosystem where students are empowered with 21st century skills and are motivated to learn from each other through peer teaching. They train and mentor senior school students (Educators) in their formative years of age 12-16 to teach their juniors (Learners) in a uniquely designed classroom structure. They offer after school academic support in low-income private schools at a very affordable cost.

Sector:
Education & Training

JUNIOR ART LAB

Singaporeans **Aminur Rasyid Bin Mohamed Anwar and Siti Zarifah Binte Zaini**

Junior Art Lab is an edu-tech social enterprise committed to creating unique learning experiences to nurture creative confidence and empower learners through art, design and technology. They are focused on giving access to children from less privileged backgrounds baseline ICT skills and creative thinking through art and design.

Sector:
Agriculture

KHEMDRO DAIRY

Bhutanese **Sherab Dorji**

Khemdro Dairy is a cooperative value chain based in central Bhutan that works with local dairy farmers to not only boost profitability but also empower women. It provides grants and microcredits to member farmers to incentivize dairy development besides directly sharing parts of its profit. Khemdro Dairy seeks to form a farmer-centric value chain that delivers strong financial returns to member farmers while supplying high quality local dairy products to consumers.

Sector:
Food & Beverage

KONCHHLAT

Cambodians **Kieng Lyheang, Chea Sreysors and Mang Keomonita**

KONCHHLAT aims to provide food with high nutritional value to children. Banana nutrient instant porridge is made from fresh banana with drying process technology, mixed with other natural ingredients such as dried cereal and green vegetable. The drying method is conducted differently according to characteristic of each type of raw material by ensuring that the final product has high quality, high nutrient, convenience, acceptable price and is safe.

MUSIMPANEN INDONESIA

Indonesians **Erdi Pratama, Gilang Indy Ashari and Alif Oktafian**

Sector:
Agriculture,
Environment & Energy

Musimpanen Indonesia is an agricultural enterprise focused on plantation, agricultural land management, and transforming neglected commodities to valuable goods. They have a goal to integrate upstream and downstream sectors, while focusing on sustainability of the environment. They currently have 2 projects where they convert corn and citronella into snacks and toiletries for sale.

MANRAM

Indians **Vishnu Harikumar, Ajmal Muhammad and Vijaya Kumar**

Sector:
Agriculture,
Consumer Goods &
Services

Millet farmers in south and central India are undergoing chronic depeasantization due to lack of value addition and dearth of market linkages. MANRAM is a millet-processing-cluster with its own farmer producer organizations (FPOs) and produces a gluten free millet-based-snack. MANRAM collectivizes millet farmers and provide them a fair price, necessary technology and training. MANRAM would help the farmer realize better prices for his/her product through fair prices and value addition. It would also bring to the market a nutritious snack.

PINK COLLAR

PINKCOLLAR

Malaysians **Zenna Law and Cadence Cheng Shi Hui**

Sector:
Technology & Digital
Platform Platform

Pinkcollar is a registry-based matchmaking website for the recruitment of live-in domestic workers in Southeast Asia, with increased transparency through the use of technology to support the just treatment of workers. It is disruptive innovation, envisioned as a digital website and mobile app that directly connects two user groups — domestic workers, and employers of domestic work — into ethical work arrangements.

PROJECT PAPLET

Malaysians **Chong Chen Fung, Siva Nagappan and Marissa Asfirah**

Sector:
Consumer Goods &
Services,
Environment & Energy

Project Paplet aims to curb excessive wastage of paper. Only 5% of the paper used gets recycled in Malaysia. They encourage the general public to make full use of paper by utilizing both sides of the paper before discarding or recycling it. Project Paplet collects one-sided used paper from institutions such as universities and local corporations, then compiling them into booklets to promote efficient use of paper. The booklets made, called "Paplets", are sold to interested parties and also distributed to unfortunate people such as orphanages and refugees throughout Malaysia.

SCAN BOOK

Cambodians **Thao Puthearith,**
Ly Sophea and Nhev Chanpenhpunloeu

Sector:
Education & Training,
Technology & Digital
Platform

At high school, every lesson is theory based. Students never get the chance to see or experiment what they're learning at all. Therefore, to fix this problem, Scan Book plans to create an app that scans black and white pictures in high school student books which then links to resources on the internet such as images, videos and 3D models for students to see. In addition to that, this app teaches student to self-research on internet which is crucial skill for this century.

THE KISAN UNION

Singaporeans **Ho Jing En** and
Kannan Venkataramanujam
Indian **Nikhil Mukkawar**

Sector:
Technology & Digital
Platform

The Kisan Union believes that solutions for the poor should not be poor. It aims to bridge the gap between the government and rural areas by extending the reach of information and aid to the very last mile. People in rural India travel miles to access e-governance services and basic health services. The Kisan Union hopes to empower underprivileged individuals in rural areas by providing equal access to information and services. Their mobile Smart Solar Kiosk is designed to close this gap by providing access to government policies, information, and health services at their doorstep.

TREEDOTS ENTERPRISE

Singaporeans **Jong kai Jie Tylor**

Sector:
Food & Beverage,
Technology & Digital
Platform

Treedots is a B2B marketplace for under-appreciated food items to be peddled at a discounted price to our participating F&B companies, non-profit associations, and practically anyone who are capable of clearing and consuming them before they perish. Their mission is to minimise the amount of food waste starting with Singapore, and eventually the World through a self-sustaining ecosystem via the aggregation of F&B businesses on different points of the value chain within TreeDots to ensure that there is no longer a need to dispose of perfectly edible food.

UGLYFOOD

Singaporeans **Yeo Pei Shan,**
Augustine Tan Jun Hui and Lee Zhong Han

Sector:
Food & Beverage

UglyFood focuses on reducing wastage due to cosmetic filtering. UglyFood partners with fresh produce retailers and purchase their possibly rejected fresh produce at lowered prices, transforming them into appealing, nutritious and delectable food (fruit teas, cold-pressed juices, and popsicles) for their customers. This reduces stress on environment and carbon footprint at the same time. UglyFood also inspires people to make a change in their lifestyle, to be planet-friendly, by imparting relevant skills and broadening their mind with less known stories and statistics.
